Flea Prevention Tips

Fleas are not only unwanted pests, but can also carry harmful diseases. Tarrant County Public Health Department has provided some tips on how to prevent them around your home:

- Keep yards clean and clutter-free so rodents, opossums and stray cats cannot live in the area.
- Do not leave pet food out at night. It attracts other animals.
- Prevent rodents from living inside a home. They carry fleas.
- Treat pets regularly for fleas with a veterinarian-approved flea control product.
- Use a commercial flea control product before beginning rodent control in a house or yard. Fleas will search for new hosts when rodents die.
- Wear gloves and insect repellent when handling sick or dead animals.
- Use insect repellent when hiking, hunting, camping or engaging in outdoor activities.
